SKILLS

LANGUAGES

- C
- C++
- Python
- SQL

AI / ML

- Pandas
- NumPy
- Seaborn
- Matplotlib
- PyTorch
- YOLOv8
- Scikit-learn

TOOLS & PLATFORMS

- Node.js
- MySQL
- Vercel
- Supabase
- Netlify
- Render
- Canva
- Adobe

Astik Tripathi

B.Tech CSE (AI & ML) · 2nd Semester · Graphic Era University

Aspiring AI/ML engineer with hands-on experience building computer vision systems and predictive ML models. Passionate about solving real-world problems through data-driven approaches and intelligent automation.

EDUCATION

Graphic Era Deemed to be University

B.Tech — Computer Science & Engineering (AI & ML) | 2025 – Present | Dehradun

SGPA 9.25

Greenway Modern School, Roorkee

Class XII — CBSE | Roorkee, Uttarakhand

83%

Scholars Academy, Roorkee

Class X — CBSE | Roorkee, Uttarakhand

93%

PROJECTS

Traffic Object Detection System

↗ GitHub

Built a real-time traffic object detector using YOLOv8 to identify and classify vehicles, pedestrians, and road objects from video feeds. Integrated AI/ML pipeline for inference and result visualization.

- YOLOv8
- Python
- PyTorch
- OpenCV

Traffic Accident Severity Prediction

↗ GitHub

Developed a multi-model ML system predicting accident severity (Minor / Moderate / Severe) from features like speed, weather, time of day, and road conditions. Compared SVM (Linear, RBF, Polynomial), Logistic Regression, Decision Tree, and Random Forest; evaluated using macro recall.

- SVM
- Logistic Regression
- Random Forest
- Pandas
- Scikit-learn

Smash Sessions Unleashed — Startup Website

↗ GitHub

Designed and developed a full production website for a startup, handling end-to-end development from UI design to deployment.

- Node.js
- Supabase
- Vercel
- Web Dev

CERTIFICATIONS

Computer Networks and Internet Protocols

NPTEL — IIT Certification

Data Analytics Job Simulation

Deloitte Australia — Forage Platform
